April 2013

Monthly Sky Calendar
Prepared Specifically For
The Hampton Roads Area

Upcoming Regular Meetings

DATE	Monday, April 22, 2013
TIME	6 - 8 PM EST
WHERE	Chesapeake Public Library, Major Hillard branch Conf. Room
TOPIC	Astronomical Software demonstrations

DATE	Monday, May 20, 2013
TIME	6 - 8 PM EST
WHERE	Chesapeake Public Library, Major Hillard branch Conf. Room
TOPIC	The Planet Saturn

Comet C/2011 L4 PanSTARRS Meets The Moon

Photo By Glendon L. Howell

Glen took this image of Comet PanSTARRS and the crescent moon at 8:05 PM EDT on March 12, 2013, from a site near US17 and Ballahack Road in Chesapeake. The trees in the background lie along the Dismal Swamp Canal. The image was acquired by his Canon Digital Rebel XTi DSLR on a tripod, equipped with a Canon EFS 75-300mm zoom set to 190mm. Exposure was 6 seconds at f/5.6 at ISO 800. Look for more of Glen's images on his website "Glen's Universe" at <http://www.freewebs.com/howellgl>

A Night of Observing at Pettigrew State Park

By Kent Blackwell

Comet PanSTARRS was at its brightest on March 9, 2013. Unfortunately, it was also quite close to the setting sun so it could only be seen from a location with a good western horizon. I was considering various sites and at the last minute Robert Hitt and I decided to take our homemade teardrop trailer (nicknamed Gypsy Wagon) to Pettigrew State Park in North Carolina. The campground is located on Lake Phelps, about 95 miles south of Virginia Beach, VA. The campground's boat ramp provides an excellent western horizon.

Before setting up the telescope we walked over to Somerset Place, an antebellum plantation. It was an active plantation from 1786-1865 and encompasses 100,000 acres and was at one time a prosperous plantation of rice, wheat and corn. The plantation operated as a business investment for more than forty years. In 1829 it became the home to two generations of a planter family, Josiah Collins III, his wife Mary and their six sons. When the civil war ended in 1865 so did slavery. Left without unpaid labor, planters such as the Collins family could no longer maintain the plantation system that had characterized much of the antebellum south.

To get to Somerset Place just walk down Carriage Nature Trail from the campground. You'll be able to tour the Collins Family Home and many of the related domestic dependencies as well as reconstructed dwelling places where many of the slaves lived.

Before setting up my telescope at the boat ramp Bob and I enjoyed a nice, hot "Dee Diffrient" spaghetti dinner. Thanks, Dee for providing the spaghetti.

After dinner I drove about 500 yards to the boat ramp area to set up my telescope. To my surprise four other amateur astronomers were already setting up telescope in the rather small area. All of them hauled their telescopes in trailers from the Philadelphia, PA area. Telescopes ranged in sizes from 10" to a 25" Obsession. Robert Werkman from Hershey, PA possessed one of the most beautiful telescopes I have ever seen, finished in a highly polished mahogany. He ordered the 22" f/3.5 Dobsonian custom made from an individual in Australia.

All eyes faced west as the sun sank below the

horizon. I scanned the skies with 10x50 binoculars as well as with my 80mm f/8 TMB refractor but no luck. None of us were able to see **Comet PanSTARRS**. We had been promised a very bright comet some weeks before but comets are often compared to cats. They both have tails and both do exactly what they want. Astronomer Fred Whipple put it aptly, "If you want to bet on something stick to betting on horses". Instead of reaching naked eye visibility the comet barely reached 1st magnitude, difficult to see so close to the setting sun.

As darkness fell we all knew it was going to be a special night. The sky was beautiful soon after astronomical twilight. The view of mighty Orion reflecting in Lake Phelps was wonderful. The bright star Canopus was on the meridian and only 7-degrees above the southern horizon. Canopus is not usually seen from our northern latitude.

My Sky Quality Meter read 21.3, not bad for early in the evening. By 8:00 pm the reading had climbed to 21.4. Checking the meter at 10:00 pm the reading was 21.5, indicating a very dark sky indeed. By midnight it read 21.82, the darkest sky I have seen in a long time. That means we were seeing naked eye stars fainter than 7th magnitude.

Since the view of the southern horizon was so exceptional I decided to concentrate on southern deep sky objects. First was the large globular cluster **NGC 3201** in Vela, another object rarely seen from our latitude. The

exact date of its discovery is uncertain, perhaps by James Dunlop in 1826 and cataloged at the time as Dunlop 445. **NGC 3201** is a relatively nearby globular cluster at 16,300 light years from the sun. It was easily resolved in my telescope, despite only being a few degrees above the horizon.

I observed several open clusters in southern Puppis before turning my telescope high in the northern sky to explore some Ursa Major NGC galaxies hitherto unseen by me. I managed to view about two-dozen, concentrating on the faintest that could be seen in my 14" telescope. Josh Wright was also exploring faint galaxies with his 25" Obsession while Jim Werth was concentrating on planetary nebulae with his 22" telescope.

I quit about midnight but the others continued on. They had driven all the way from Pennsylvania several nights before and wanted to make the best of the glorious Pettigrew sky. The sky is darker than Coinjock, but, at least for me not as convenient. If you go to Pettigrew to camp I suggest you take every provision you might need because there are few, if any convenience stores nearby.

The rangers at Pettigrew State Park are very accommodating to amateur astronomers. They turned out the streetlight at the boat ramp as well as the light on the outside of the public restroom for me. The campground has been getting very good ratings by those coming to stargaze. The downside is the campsites themselves are, for the most part, located in areas of tall trees. The only place one can get a descent horizon in the boat ramp overlooking Lake Phelps, and space is at a minimum. Another problem is the wind. Being so unsheltered if it's a windy night observing from the ramp would be nearly impossible.

Although we didn't see **Comet PanSTARRS** it was a terrific Saturday night camping trip to Pettigrew State Park. We met four friendly amateur astronomers from Pennsylvania and we all enjoyed mesmerizing dark skies.

International Astronomy Day Saturday, April 20, 2013

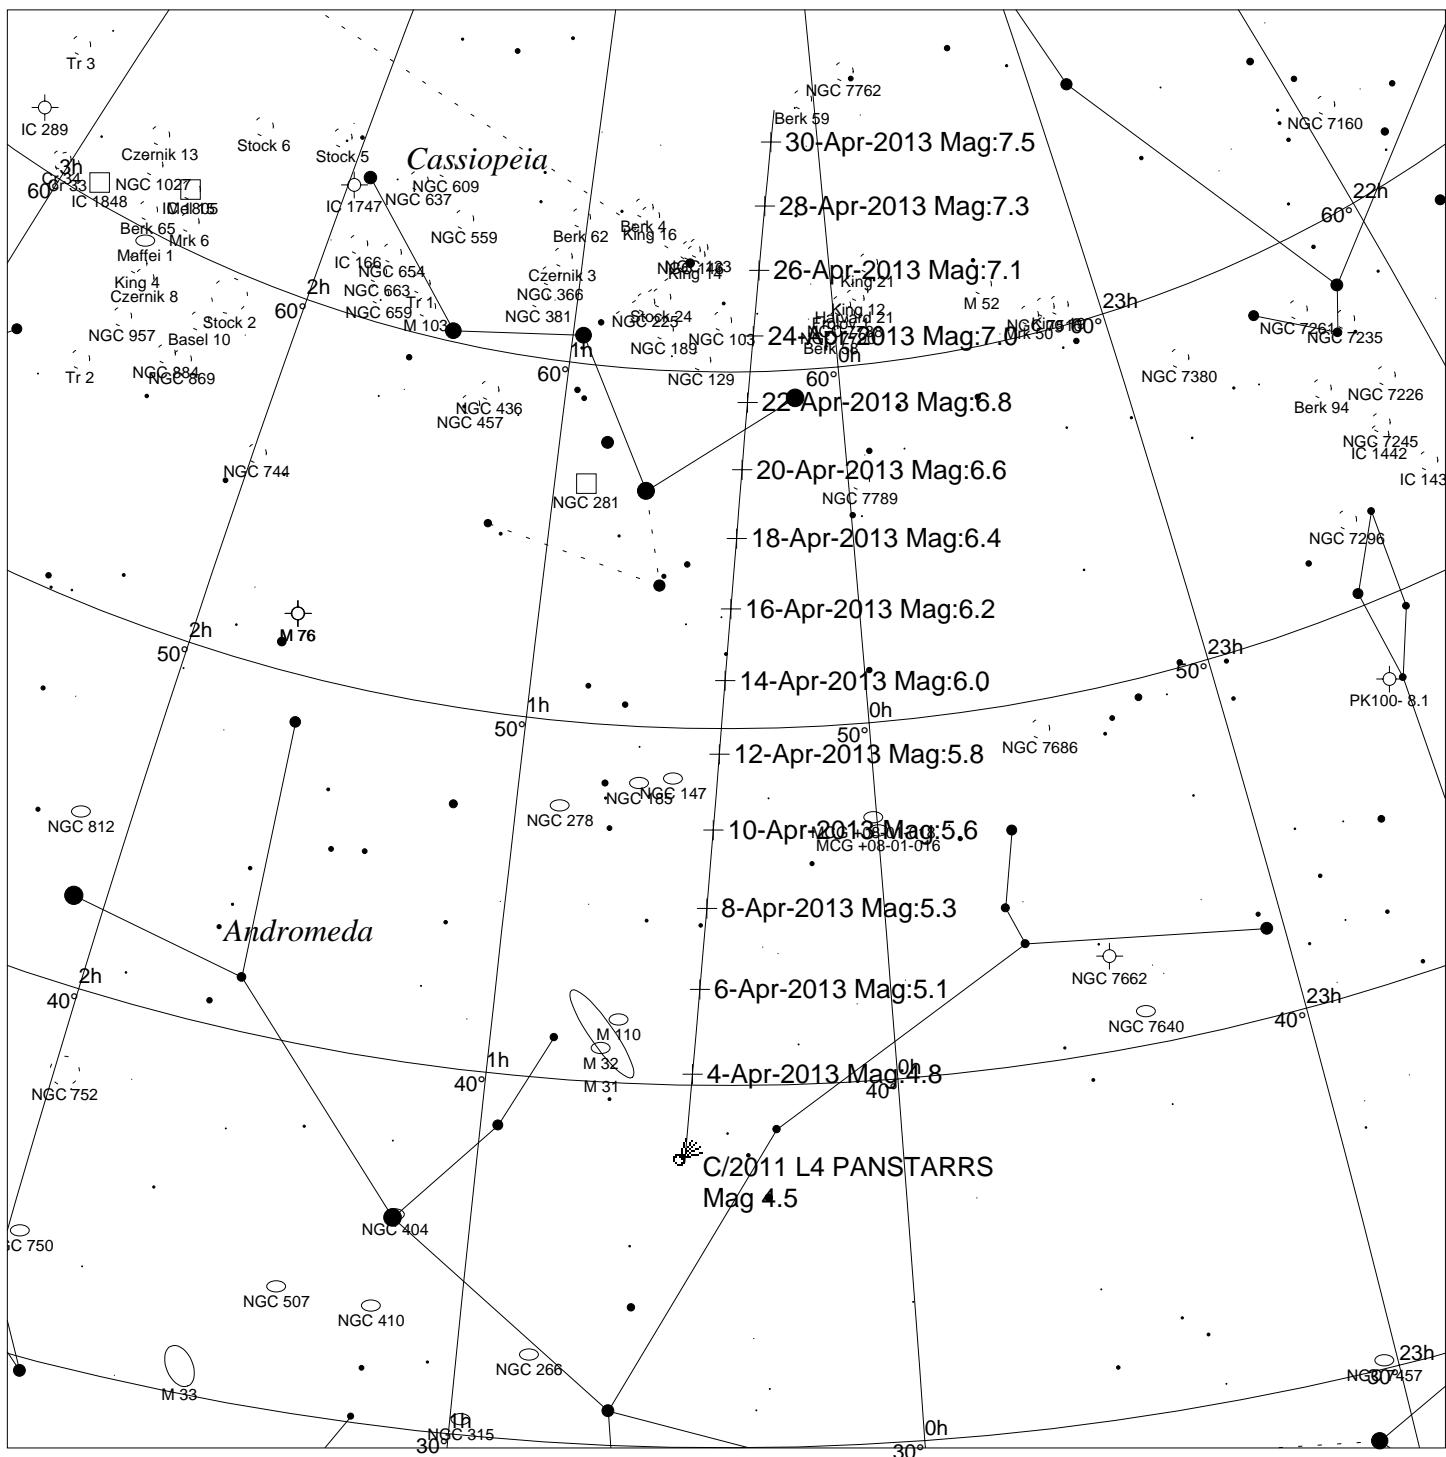

"Bringing Astronomy to the Public"

Telescopes Needed For Outreach At Triple-R-Ranch May 14

Members of the NAS have been invited to come and setup telescopes at Triple-R-Ranch in Chesapeake on Tuesday, May 14. John Gorman, who teaches 6th and 7th grade science at Norfolk Christian Schools has once again invited us to come and setup telescopes for his students.

A quick look ahead for sky events on that date shows the Moon will be visible as a thick waxing crescent, along with the planets Saturn and Jupiter. Other possible targets of the night might include the open cluster Praesepe (M44) in Cancer, the globular cluster M13 in Hercules, and the globular cluster M3 in Canes Venatici. Comet C/2011 L4 PanSTARRS at magnitude +8.4 might also be within reach, lying very near Gamma Cephei.

Comet C/2011 L4 PanSTARRS in April

STARS	SYMBOLS	Comet continues to head north from Andromeda into Cassiopeia. Around April 4 it makes a close pass to M31.

Calendar

	Start	End	Category	Description
22 Apr 2013	6:00 PM	6:00 PM	Meetings	NAS Regular Meeting at Chesapeake Public Library Major Hillard branch
	7:48 PM	7:48 PM	Sun	Sunset
	7:58 PM	7:58 PM	Algol Minima	Algol at mag. +3.4 minimum (+/-5 hours)
	8:31 PM	8:31 PM	Iridium Flare	CHES:Iridium 14 Flares at mag.-1.9 (Azm 352 Alt 32)
	8:37 PM	8:37 PM	Iridium Flare	CHES:Iridium 64 Flares at mag. 1.6 (Azm 349 Alt 29)
	8:58 PM	8:58 PM	Sat Pass (ISS)	CHES:ISS Passes NW to E (Azm 30.5 Alt 22)
	9:20 PM	9:20 PM	Twilight	Astronomical Twilight ends
	10:32 PM	10:32 PM	Sat Pass (ISS)	CHES:ISS Passes NW to SE (Azm 289.8 Alt 14)
	11:15 PM	11:15 PM	Jupiter	Jupiter sets
	11:30 PM	11:30 PM	Jup GRS	GRS Transit (CML=192)
23 Apr 2013	4:46 AM	4:46 AM	Moon	Moonset
	4:50 AM	4:50 AM	Twilight	Astronomical Twilight begins
	5:08 AM	5:08 AM	Meteor Shower	pi-Puppids meteor peak (zhr=10)
	6:23 AM	6:23 AM	Sun	Sunrise
	8:46 AM	8:46 AM	Jupiter	Jupiter rises
	9:26 AM	9:26 AM	Jup GRS	GRS Transit (CML=192)
	5:43 PM	5:43 PM	Moon	Moonrise
	7:22 PM	7:22 PM	Jup GRS	GRS Transit (CML=192)
	7:48 PM	7:48 PM	Sun	Sunset
	8:07 PM	8:07 PM	Sat Pass (ISS)	CHES:ISS Passes NW to E (Azm 25.1 Alt 15)
	8:31 PM	8:31 PM	Iridium Flare	CHES:Iridium 67 Flares at mag. 0.9 (Azm 349 Alt 30)
	9:21 PM	9:21 PM	Twilight	Astronomical Twilight ends
	9:43 PM	9:43 PM	Sat Pass (ISS)	CHES:ISS Passes NW to SE (Azm 285.6 Alt 65)
	9:43 PM	9:43 PM	Sat Pass (ISS)	CHES:ISS Passes NW to SE (Azm 285.6 Alt 66)
	11:12 PM	11:12 PM	Jupiter	Jupiter sets
24 Apr 2013	12:16 AM	12:16 AM	Lunar Occult	Moon occults 4.7 mag. double star ZC1815(D) chi Vir
	4:48 AM	4:48 AM	Twilight	Astronomical Twilight begins
	5:18 AM	5:18 AM	Jup GRS	GRS Transit (CML=192)
	5:22 AM	5:22 AM	Moon	Moonset
	6:22 AM	6:22 AM	Sun	Sunrise
	8:42 AM	8:42 AM	Jupiter	Jupiter rises
	3:14 PM	3:14 PM	Jup GRS	GRS Transit (CML=192)
	6:50 PM	6:50 PM	Moon	Moonrise
	7:49 PM	7:49 PM	Sun	Sunset
	8:23 PM	8:23 PM	Iridium Flare	CHES:Iridium 14 Flares at mag. 0.4 (Azm 347 Alt 33)
	8:24 PM	8:24 PM	Iridium Flare	CHES:Iridium 72 Flares at mag.-0.3 (Azm 348 Alt 32)
	8:53 PM	8:53 PM	Sat Pass (ISS)	CHES:ISS Passes NW to SE (Azm 37.2 Alt 51)
	9:00 PM	9:00 PM	Diary	Spica 0.1S of Moon Occn
	9:22 PM	9:22 PM	Twilight	Astronomical Twilight ends
	10:27 PM	10:27 PM	Sat Pass (ISS)	CHES:ISS Passes W to S (Azm 263.2 Alt 10)
