May 2014

Monthly Sky Calendar  
Prepared Specifically For  
The Hampton Roads Area

## Upcoming Regular Meetings

|              |  |
|--------------|--|
| <b>DATE</b>  | Monday, May 12, 2014                                       |
| <b>TIME</b>  | 6 - 8 PM EDT   |
| <b>WHERE</b> | Chesapeake Public Library, Major Hillard branch Conf. Room |
| <b>TOPIC</b> | The Planet Mars  |

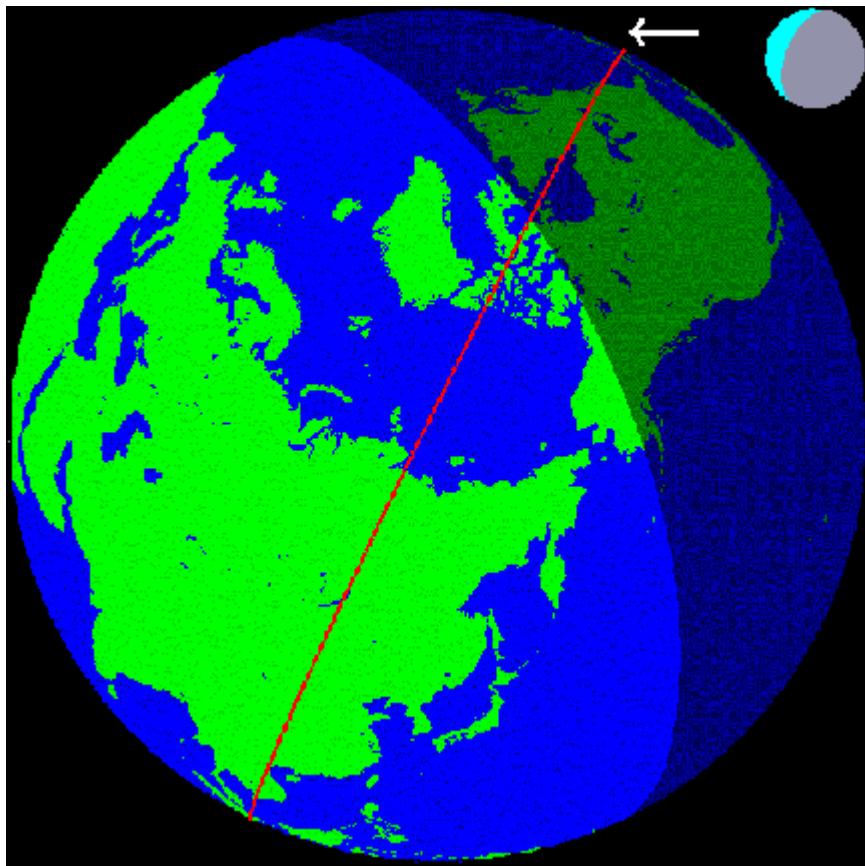

|              |  |
|--------------|--|
| <b>DATE</b>  | Monday, June 16, 2014                                      |
| <b>TIME</b>  | 6 - 8 PM EDT   |
| <b>WHERE</b> | Chesapeake Public Library, Major Hillard branch Conf. Room |
| <b>TOPIC</b> | Hubble Repair Mission                                      |

### **Total Lunar Eclipse of April 15, 2014**

Photo By Glendon Howell

Clouds darted in and out as Glen Howell took this image at 2:07 AM EDT, just as totality began the morning of April 15. He used his Canon Digital Rebel XTi and a Canon EFS 75-300 zoom, set to 300mm f/8. Expose was 10 seconds at ISO200. Camera was tracking on an iOptron Skytracker. The bright star at 5 o'clock from the moon is Spica. Look for more of his images on Glen's Universe (<http://www.freewebs.com/howellgl/>)

*North America is favored with the best view of seeing this new meteor shower in darkness. Observers to the left of the red line will have the moon up in the sky which should not seriously interfere with observation.*

### **May 24 Potential Meteor Storm?**

Weather permitting, plan to get up early Saturday morning, May 24, 2014. Between the hours of 3 to 4 AM EDT, the Earth will pass through the orbital plane and be sandblasted by the debris of Comet 209P/Linear in what could become a new meteor shower with the potential to become a meteor storm. Best estimates at present suggest a zenithal hourly rate of between 100 to 400 meteors per hour, but as many as 1000 meteors per hour could occur. Meteors are expected to emanate out of the constellation of Camelopardalis.

North America is favored with the best view of the event. The radiant will lie low in the north-northeastern sky at time of peak. The moon will be a waning crescent, rising at 3:13 AM local time, but should not pose a serious obstacle to observation. Get away from the city lights for the best potential view. Look about 40 degrees away from the radiant for the longest meteor trails.

Comet 209P/Liner was discovered in 2004 by the Lincoln Near Earth Asteroid Research (LINEAR) project automated sky survey. The comet is a member of Jupiter's family of captured comets, with a period of only 5.04 years. The comet passes closest to Earth's orbit May 6, with Earth passing by just 18 days later. The big question now is will it storm or not?

### **Night Launch From NASA Wallops Scheduled for June 9**

After having been rescheduled several times already, the latest news puts the launch of the ORS-2 supply mission to ISS from Wallops to occur no earlier than 2 AM June 9. Further delays are not out of the question. Each day delayed will bring the launch window 23 minutes earlier. A delay of more than about 15 days would thus move the launch window back into daylight hours.

# East Coast Star Party

**What:** East Coast Star Party (ECSP)

**When:** May 29, 30, 31 (Party ends Sunday morning, June 1)

**Where:** Hampton Lodge Campground, Coinjock NC

**Star Party Fee:** One time fee of \$20 for the entire time star party.  
Register with Kent at the observing site

**Camping Fees** (If camping, register at the campground store.):

- \$20/night per campsite for primitive camping. Includes tents and trailers not requiring electricity.
- \$30/night for trailers & R/V requiring electric, water but no sewage. The trailer sites with electricity and water are not in the observing area, but close by.
- \$40/night for trailers requiring electric, water & sewage.

Whether it's clear or not most people that have attended previously think it's one of the most fun star parties of any.

If you need additional information contact:

## COSMOS: A Space Odyssey

Airs Sunday, March 9 on FOX and National Geographic Channel

More than three decades after the debut of "Cosmos: A Personal Voyage," Carl Sagan's stunning and iconic exploration of the universe as revealed by science, COSMOS: A SPACETIME ODYSSEY sets off on a new voyage for the stars. Seth MacFarlane (FAMILY GUY, AMERICAN DAD) and Sagan's original creative collaborators – writer/executive producer Ann Druyan and astronomer Steven Soter – have teamed to conceive a 13-part docu-series that will serve as a successor to the Emmy and Peabody Award-winning original series.

Hosted by renowned astrophysicist Neil deGrasse Tyson, the series will explore how we discovered the laws of nature and found our coordinates in space and time. It will bring to life never-before-told stories of the heroic quest for knowledge and transport viewers to new worlds and across the universe for a vision of the cosmos on the grandest scale. COSMOS: A SPACETIME ODYSSEY will invent new modes of scientific storytelling to reveal the grandeur of the universe and re-invent celebrated elements of the legendary original series, including the Cosmic Calendar and the Ship of the Imagination. The most profound scientific concepts will be presented with stunning clarity, uniting skepticism and wonder, and weaving rigorous science with the emotional and spiritual into a transcendent experience.

| Episode | Air Date   | Title                           |
|---------|------------|---------------------------------|
| 1       | 03/09/2014 | Standing Up In The Milky Way    |
